

Hardcoding Issues – Part 1

The screenshot shows an Android Studio environment. On the left, a code editor displays the following Java code for `HardcodeActivity.java`:

```
1  andro@14b: ~/Desk...
drwxrwxr-x 3 andro andro 4096 Apr 30 18:36 android
drwxrwxr-x 3 andro andro 4096 Apr 30 18:36 jakhar
andro@14b:~/Desktop/Tools/MARA_Framework/tools/jadx-0.6.0/bin$ cat /home/andro/Desk...
esktop/diva_source_no_res/jakhar/aseem/diva/HardcodeActivity.java
package jakhar.aseem.diva;

import android.os.Bundle;
import android.support.v7.app.AppCompatActivity;
import android.view.View;
import android.widget.EditText;
import android.widget.Toast;

public class HardcodeActivity extends AppCompatActivity {
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_hardcode);
    }

    public void access(View view) {
        if (((EditText) findViewById(R.id.hcKey)).getText().toString().equals("vendorsecretkey")) {
            Toast.makeText(this, "Access granted! See you on the other side :)",
                0).show();
        } else {
            Toast.makeText(this, "Access denied! See you in hell :D", 0).show();
        }
    }
}
```

On the right, the Android emulator (lab:5554) displays the app's interface. The title bar reads "2. Hardcoding Issues - Part 1". Below the title, the objective and hint are shown:

Objective: Find out what is hardcoded and where.
Hint: Developers sometimes will hardcode sensitive information for ease.

The main content area shows the hardcoded string `vendorsecretkey` in a pink box, followed by an `ACCESS` button. At the bottom, a toast message displays: "Access granted! See you on the other side :)"
