

PHONESPLOIT

Siguiendo el tutorial del video:

```
(root@kali) ~/home/kali
# sudo apt update
Hit:1 http://http.kali.org/kali kali-rolling InRelease
2151 packages can be upgraded. Run 'apt list --upgradable' to see them.

(root@kali) ~/home/kali
# apt install -y ffmpeg adb wget git pkg-config meson ninja-build \
  libavcodec-dev libavdevice-dev libavformat-dev \
  libavutil-dev libswresample-dev libusb-1.0-0 libusb-1.0-0-dev
adb is already the newest version (1:34.0.5-12+bi).
wget is already the newest version (1.25.0-2).
The following packages were automatically installed and are no longer required:
  libcrypt-dev python3-gpg samba-ad-dc samba-ad-provision samba-dsdb-modules
Use 'sudo apt autoremove' to remove them.

Upgrading:
  git git-man libusb-1.0-0 libvpl2 libxvi

Installing:
  ffmpeg libavcodec-dev libavdevice-dev libavformat-dev libavutil-dev libswresample-dev libusb-1.0-0-dev meson ninja-build pkg-config

Installing dependencies:
  libavcodec62 libavfilter-dev libavformat62 libbluray3 libplacebo360 librubberband3 libswresample6 libswscale9 libusb-1.0-doc libx264-165 pkgconf-bin
  libavdevice62 libavfilter11 libavutil60 libpkgconf7 librav1e0.8 libsvtavcodec4 libswscale-dev libudfread3 libvpx12 pkgconf

Suggested packages:
  ffmpeg-doc libcudat1 libnvcuvid1 libnvidia-encode1 frei0r-plugins libbluray-bdj
```

Instalación de herramientas necesarias en Kali Linux (ffmpeg, adb, git, etc.) y actualización de paquetes.

Adb ya lo tenemos actualizado.

```
(root@kali) ~/home/kali

```

Clonación del repositorio PhoneSploit-Pro, un framework para explotar y gestionar dispositivos Android mediante ADB.

Menú principal de PhoneSploit-Pro v2.0, muestra todas las opciones como conectar dispositivo, listar dispositivos, hacer screenshot, grabar pantalla, instalar APKs, etc.

Vamos a usar Shodan para hacer buscar un dispositivo al que conectarnos, tenemos que encontrar uno que no requiera de autenticación.

Nos da información de dispositivos conectados vía ADB se listan varias IPs geolocalizadas (Chile, Portugal, Japón, Corea del Sur), indicando que podrían ser objetivos de conexión o dispositivos remotos.

[Error] adb: error: failed to stat remote object '/sdcard/screenshot-2026-5-5-7-18-21.png': Permission denied
99: Clear 0: Exit
[Main Menu] >
```

Intento de conexión a la IP 165.234.210.24 mediante ADB. Luego se ejecuta la opción 6 (Get Screenshot), pero falla con error Permission denied al intentar acceder a /sdcard/screenshot-...png.

```
kaib@kali:~$ cd /root/.android/adb-30.0.0/
root@kali:~/android/adb-30.0.0#

# Advanced Exploit Tool

v2.0 By github.com/AzeemIdrisi

46. Clear App Data  

47. Save Logcat Snippet  

48. Grant / Revoke Permission  

49. Restart App  

50. Live Logcat Stream

51. Network Snapshot  

52. Install Split APKs  

53. Developer Settings  

54. Read Locale  

55. Screen Stay-On

56. WiFi Status Dump  

57. WLAN IP Info  

58. WiFi Radio Toggle  

59. Ping Connectivity  

60. Saved WiFi Networks
